Contents of Volume 58

Volume 58, Number 1, May 7, 1974

AUTHOR INDEX, Volume 58, Number 1	ii
B. SHORE and V. SHORE. An Apolipoprotein Preferentially Enriched in Cholesteryl Ester-Rich Very Low Density Lipoproteins	1
GERRIT VOORDOUW, G. MAURICE GAUCHER and RODNEY S. ROCHE. Anomalous Molecular Weights of Proteases in Gel Chromatography	8
ROBERT BLOCH and MAX M. BURGER. Purification of Wheat Germ Agglutinin Using Affinity Chromatography on Chitin	13
DAN W. REED, ROBERT E. TOIA, JR. and DAN RAVEED. Purification of Azotrophore Membranes Containing the Nitrogenase from <i>Azotobacter vinelandii</i>	20
G. P. KREISHMAN, J. P. MILLER, P. DEA, Z. HUSSAIN, L. A. WILSON, and M. P. SCHWEIZER. 300 MHz PMR Studies on the Conformation of the Hexanucleotide, 2'OMeGpApApYpAp ψ from the Anticodon Loop of Torula Yeast tRNA ^{Phe}	27
J. LUMSDEN and D. O. HALL. Soluble and Membrane-Bound Superoxide Dismutases in a Blue-green Alga (Spirulina) and Spinach	35
NARAYAN G. AVADHANI and ROBERT J. RUTMAN. A Sensitive <i>in vitro</i> Protein Synthesizing System from Ehrlich Ascites Mitochondria	42
W. T. GARRARD, W. R. PEARSON, S. K. WAKE and JAMES BONNER. Stoichiometry of Chromatin Proteins	50
WALTER C. VINSON and JEROME M. SEYER. Synthesis of Type III Collagen by Embryonic Chick Skin	58
H. CHANCE, N. KADOHOMA and K. M. ANDERSON. Isolation of a Rat Ventral Prostate Chromatin Fraction Exhibiting a Singular Melting Profile	66
J. T. STOKLOSA and H. W. LATZ. Molecular Weight Determinations of Proteins by Polyacrylamide Gel Electrophoresis with Sodium Dodecyl Sulfate in just the Sample Solution	74
THOMAS H. JUKES. The "Intruder" Hypothesis and Selection against Arginine	80
OSCAR SUDILOVSKY. <i>In Vivo</i> Regulation of Hepatic Protein Kinase by Adenosine 3',5'-Monophosphate mediated Glucagon Stimulation	85
MICHAEL R. STALLCUP, WILLIAM J. SHARROCK and JESSE C. RABINOWITZ. Ribosome and Messenger Specificity in Protein Synthesis by Bacteria	92
SRINIVASA S. RAGHAVAN, RICHARD A. MUMFORD, and JULIAN N. KANFER. Synthesis of Glucosylceramide by Purified Calf Spleen β -Glucosidase	99
C. DAVID IANUZZO, MARTIN LESSER, and FRANK BATTISTA. Metabolic Adaptations in Skeletal Muscle of Streptozotocin-Diabetic Rats Following Exercise Training	107
ELI KAPLAN and H. G. RICHMAN. Inductive-Like Stimulation of RNA and Protein Synthesis by Calcium in Heart Slices	112
CHARLES L. MURPHY, GEORGE J. FAINI and JOHN LEE. Separation of the Apoprotein and Reconstitution of the Holoprotein from the Long-lived Intermediate in Bacterial Bioluminescence	119
ANTHONY L. FINK and NANCY E. GOOD. Evidence for a Glucosyl-Enzyme Intermediate in the β -Glucosidase-Catalyzed Hydrolysis of <i>p</i> -nitrophenyl- β -D-Glucoside	126
ERROL C. FRIEDBERG and I. R. LEHMAN. Excision of Thymine Dimers by Proteolytic and Amber Fragments of <i>E. coli</i> DNA Polymerase I	132
TOSHI KANEDA. Enzymatic Aromatization of 4-Ketocyclohexanecarboxylic Acid to <i>p</i> -Hydroxybenzoic Acid	140
KAORU NOZU and BUN-ICHI TAMAOKI. Incorporation of ¹³¹ I-labeled Androgen-Receptor into Nuclei of Rat Prostates	145
J. M. DUCRUET and J. LAVOREL. Effect of System II Inhibitors on Luminescence in NH ₂ OH - Pretreated Chlorella	151
SHERWIN S. LEHRER and PAUL C. LEAVIS. Fluorescence and Conformational Changes Caused by Proton Binding to Troponin C ¹	159
J. C. MAXWELL, J. A. VOLPE, C. H. BARLOW, and W. S. CAUGHEY. Infrared Evidence for the Mode of Binding of Oxygen to Iron of Myoglobin from Heart Muscle	166
G. A. LANZANI, M. GIANNATTASIO, L. A. MANZOCCHI, R. BOLLINI, A. N. SOFFIENTINI, and V. MACCHIA. The Influence of Cyclic GMP on Polypeptide Synthesis in a Cell-Free System Derived from Wheat Embryos	172

ELLIOT L. HERTZBERG and PETER C. HINKLE. Oxidative Phosphorylation and Proton Translocation in Membrane Vesicles Prepared from <i>Escherichia coli</i> . . .	178
MASAMI WATANABE and MASAKATSU HORIKAWA. Analyses of Differential Sensitivities of Synchronized HeLa S3 Cells to Radiations and Chemical Carcinogens During the Cell Cycle: (II) Ultraviolet Light . . .	185
RICHARD W. FURLANETTO, MASATAKA MOCHIZUKI, and E. T. KAISER. Aryl α -Haloalkyl Ketoximes as Enzyme Modifying Agents. The Reaction of α -Haloacetophenone Oximes with the Active Site of Papain . . .	192
WILLIAM H. WOODRUFF, THOMAS G. SPIRO, and CHARLES GILVARG. Raman Spectroscopy <i>in vivo</i> : Evidence on the Structure of Dipicolinate in Intact Spores of <i>Bacillus megaterium</i> . . .	197
SIMON H. DE BRUIN, HARRY S. ROLLEMA, LAMBERT H. M. JANSSEN, and A. J. VAN OS. The Interaction of 2,3-Diphosphoglycerate with Human Deoxy- and Oxyhemoglobin . . .	204
SIMON H. DE BRUIN, HARRY S. ROLLEMA, LAMBERT H. M. JANSSEN, and GERARD A. J. VAN OS. The Interaction of Chloride Ions with Human Hemoglobin . . .	210
RODERICH WALTER, IAN C. P. SMITH, and ROXANNE DESLAURIERS. The Conformation of Oxytocin in Dimethylsulfoxide as Revealed by Carbon-13 Spin-Lattice Relaxation Times. . .	216
HARRY G. RITTENHOUSE, ROBERT E. WILLIAMS, BERNADINE WISNIESKI, and C. FRED FOX. Alterations of Characteristic Temperatures for Lectin Interactions in LM Cells with Altered Lipid Composition . . .	222
ERIC R. MANLEY, HAROLD B. SKRDLANT, ELIZABETH HANSBURY, and TERENCE J. SCALLEN. Conversion of Diglyceride to Triglyceride by Rat Liver Microsomes: A Requirement for the 105,000 x g Supernatant . . .	229
L. CHARLES DICKINSON and J. C. W. CHIEN. Cobalt Cytochrome C: Preparation and Characterization . . .	236
NOBUO NEMOTO and SHOZO TAKAYAMA. Rapid Loss of 7-Methylguanine From Liver Nucleic Acids in Mice During the Initial Stage of Liver Carcinogenesis Induced by Dimethylnitrosamine . . .	242
SHIN NAKAMURA, SADA AKI IWANAGA, TOMOJI SUZUKI, YUKO MIKUNI, and KAZUHIKO KONISHI. Amino Acid Sequence of Peptide Released from Bovine Factor XIII following Activation by Thrombin . . .	250
A. URIBE, M. F. HOLICK, N. A. JORGENSEN, and H. F. DeLUCA. Action of <i>Solanum malacoxylon</i> on Calcium Metabolism in the Rat . . .	257
M. FOSTER and J. H. HARRISON. Selective Chemical Modification of Arginine Residues in Mitochondrial Malate Dehydrogenase . . .	263
S. RAMAGOPAL. Altered Specificity of Synthesis of Guanosine Tetraphosphate (ppGpp) and Pentaphosphate (pppGpp) by Salt-Washed Ribosomes . . .	268
JEROME M. SEYER and WALTER C. VINSON. Synthesis of Type I and Type II Collagen by Embryonic Chick Cartilage . . .	272
TADATSUGU TANIGUCHI and MASSIMO LIBONATI. Action of Ribonuclease BS-1 on a DNA-RNA Hybrid . . .	280
S. -C. KUO and J. O. LAMPEN. Tunicamycin — An Inhibitor of Yeast Glycoprotein Synthesis . . .	287
GIUSEPPE CILENTO, MINORU NAKANO, HIROSHI FUKUYAMA, KUNIIHIKO SUWA, and ISAO KAMIYA. Chemiluminescence in the Autoxidation of the Pyruvic Acid Analogues of a Thyroid Hormone and Related Molecules . . .	296
JOHN H. COLLINS. Homology of Myosin Light Chains, Troponin-C and Parvalbumins Deduced from Comparison of Their Amino Acid Sequences . . .	301
PAULO GAZZOTTI, HANS-GEORG BOCK, and SIDNEY FLEISHCER. Role of Lecithin in D- β -Hydroxybutyrate Dehydrogenase Function . . .	309
ROBERT KATZ, HERMAN J. C. YEH, and DAVID F. JOHNSON. A Quantitative Study of Organic Phosphate-Amine Interaction by ^{31}P Nuclear Magnetic Resonance . . .	316
VICTOR MUNOZ, STUART BRODY, and W. L. BUTLER. Photoreceptor Pigment for Blue Light Responses in <i>Neurospora crassa</i> . . .	322
JAMES M. GILLARD and GORDON TOLLIN. Effect of Complexation of Flavin Radical with Tryptophan on Electron Transfer Rates: A Model for Flavin-Protein Interactions . . .	328

CONTENTS OF VOLUME 58

- A. J. SWEETMAN, A. P. GREEN, and M. HOOPER. Energy-Linked Reactions in Mitochondria: The Effects of Some Inhibitors and their use in the Location of the Transhydrogenase Enzyme 337

ERRATA

Information for Contributors

BIOCHEMICAL AND BIOPHYSICAL RESEARCH COMMUNICATIONS is devoted to the rapid dissemination of timely and significant observations in the diverse fields of modern experimental biology. Manuscripts submitted should be so written as to clearly emphasize the novel aspects of the information reported, with the understanding that the same material has not been, nor will be, submitted for publication elsewhere.

Manuscripts in duplicate may be sent to any one of the editors whose names and addresses are listed on the inside front cover.

To ensure rapid and accurate publication, it is essential that manuscripts conform to the instructions which follow. Manuscripts which are not in accordance with these specifications may be returned.

Preparation of Manuscripts

Article length should not exceed 5 typewritten pages, double-spaced on 8.5×11 in. high quality paper (the complete manuscript, including space occupied by figures and tables, should not exceed 8 pages).

Summary. Each article must be preceded by a brief summary, typed single-spaced, not exceeding 10 lines (approximately 100-150 words). This paragraph should adequately summarize the pertinent findings of the paper.

Typing. Articles are reproduced directly from the submitted manuscript as camera-ready copy. Manuscripts must therefore be typewritten on good quality white bond paper. A black silk or carbon typewriter ribbon should be used. Special care should be taken to ensure a sharp, clean impression of letters throughout. Use of an electric typewriter is strongly recommended. Erasures should be avoided. Care must also be taken to avoid errors in spelling, word division and punctuation.

Manuscripts should be double-spaced on one side of the sheet; **references, footnotes and figure legends should be single-spaced.** Typing area of the page must be as close as possible to 6.5 in. wide and 9.5 in. long.

Symbols and Abbreviations defined in the Commission on Biochemical Nomenclature Document No. 1 (*Arch. Biochem. Biophys.* (1966) **115**, 1-12) may be used without definition. Use of all other abbreviations and symbols is to be avoided. When abbreviations are essential, they should be created in accordance with the rules of the NAS-NRC Office of Biochemical Nomenclature and **must be defined in a footnote**, rather than in the text. Such abbreviations **must not** be used in the Summary. The improper use of abbreviations may necessitate the return of manuscripts for retyping, thereby delaying publication.

Enzyme names should not be abbreviated except when the substrate has an approved abbreviation (e.g., ATPase). Use of the Enzyme Commission ("EC") code number is recommended.

Isotopes should be styled following the recommendations of the IUB Commission of Editors of Biochemical Journals. The symbol for the isotope introduced should be placed in square brackets directly attached to the front of the name (e.g., [^{32}P]CMP). Note that the isotope number should only be used as a (superior) prefix to the atomic symbol, not to an abbreviation.

For further information regarding nomenclature authors are advised to consult the Instructions to Authors of the *Archives of Biochemistry and Biophysics* (1973) **154**, iii-xii. Reprints are available from the Publisher.

Footnotes should be typed single-spaced at the foot of the page on which they are mentioned in the text. References and figure legends should be typed single-spaced on separate pages.

Illustrations and Tables. **Do not attempt to insert figures, figure legends or tables into the text.** This will be done by the Publisher.

All drawings should be done with a mechanical lettering set (e.g., Leroy; lettering size 120 or 140) and black ink. Do not use press-on lettering; typewritten lettering is not acceptable.

Figures will be reduced to fit within the type area of the page (approximately 5×8 in.); the original drawings must be planned accordingly.

Glossy photographs of drawings are acceptable provided they are sharp, clear prints with an even *black* density.

Mathematical or chemical symbols that cannot be typed should be inked in carefully in black. Structural formulas should be drawn in black ink.

Illustrations and tables should be submitted on separate sheets.

Page Numbers and Headings. Page numbers should be typed at the top of the page.

The title of the paper should be typed in capital letters near the top of the first page, with the name(s) and affiliation(s) of the author(s) typed just below. Headings within the article should be arranged according to their relative importance.

References to the literature should be cited by the number in parentheses in the text and listed in numerical order in a single-spaced typed list placed at the end of the manuscript. Abbreviations of journals should conform to those of *Chemical Abstracts Service Source Index*, 1969. Note the following examples.

For a journal article:

1. Chattoraj, D. K., and Bull, H. B. (1971) *Arch. Biochem. Biophys.* 142, 363-370.

For a book by one or more authors:

2. Robison, G. A., Sutherland, E. W., and Butcher, E. (1971) *Cyclic AMP*, pp. 298-302, Academic Press, New York.

Note that inclusive pagination must be given.

Mailing. To avoid creasing, please place manuscripts between cardboards when mailing.

Acknowledgment of Receipt. Authors desiring acknowledgment of receipt of manuscript should enclose a stamped self-addressed card.

Reprints. Reprint order forms are sent to the authors immediately upon acceptance of their manuscript. The price list is included.
